## SKILLSET

### FRONT-END

- Javascript
- CSS3 & CSS4
- HTML5
- Bootstrap
- Semantic UI
- Angular2
- ReactJS
- WebGL
- ThreeJS

### BACK-END

- ES6 / ES7
- Node.js
- Ruby
- Ruby on Rails
- Sinatra
- MongoDB
- PostgreSQL
- MySQL
- MariaDB

### EXTRA

- Amazon AWS
- Ubuntu Server
- CentOS/Redhat
- Arduino
- Raspberry Pi
- Leap Motion
- UI Design

Added Bonus: I'm fairly proficient at PhotoShop, Illustrator, and AfterEffects

## EXPERIENCE

### Gorilla Logic (May 2016 - Current)

#### Senior Software Engineer & Tech Evangelist (On-site / Remote)

In charge of creating Front-end and Back-end solutions crucial to drive development tools used to process and analyze satellite imagery.

- Automated code deployment processes
- Developed Javascript (Angular2/ReactJS/Express) and Ruby (Sinatra) microservices.
- Designed and developed dashboard solutions for end-users.

Also tasked with organizing activities, such as meetups, to foster the usage of Javascript and Ruby in the local web development community.

### AgilityFeat (August 2013 - 2016)

#### Innovation Wizard and Dev. Commanding Officer (Remote)

- Researched and implemented a walking skeleton of a Ruby on Rails application using Hadoop (HBase) as a data layer.
- Managed small team of remote developers and successfully built a walking skeleton of a multi-service application consisting of several isolated modules working seamlessly together.

### Bosz Digital (2012 - 2013)

#### Senior Creative Engineer (On-Site / Remote)

- Was an integral part of a team in charge of building an award-winning (Webby) website for Bank of America.
- Key speaker at Digital Zoomit 2013.

### PerHead Ltd. (2010 - 2012)

#### Head of Web Production Department (On-Site)

- Hired and trained a team consisting of ten professionals and implemented solutions which were crucial in provoking a shift in the company's business model, from having an 83% Telephone Service Offering income to having a 90% Internet Solutions based income.
