

About Me

I'm the swiss army knife of full-stack web development, with 14 years of experience programming scalable web applications and specialized knowledge in the field of Computer Science.

Experience

RoR Support Specialist

Harvest Profit / Remote / March 2017 - February 2018

- Hourly engagement where I was tasked with implementing features and providing support for multiple microservices built on Ruby on Rails connected to both MySQL and PostgreSQL databases.
- Successfully transitioned multiple legacy micro-services from RoR 4 to RoR 5.

Full-stack RoR Engineer

Atlas / Remote / October 2015 - January 2016

- Researched, architected and developed a full-stack scalable crowd-source solution for artists, using Ruby on Rails on Heroku with a PostgreSQL database.
- Automated deployment processes and scalability to account for both low and high traffic periods to reduce maintenance costs.

Full-stack Software Engineer

Toptal / Remote / October 2015 - Present

- Develop full-stack Ruby on Rails and React.js solutions for varied freelance projects.

Innovation Wizard and Dev. Commanding Officer

AgilityFeat / Remote / August 2013 - October 2015

- Researched and implemented a walking skeleton of a Ruby on Rails application using Hadoop (HBase) as a data layer.
- Maintained a Ruby on Rails application for the fleet management system Decisiv.

Freelance Software Engineer

TicoWebMedia / On-site & Remote / July 2013 - August 2017

- Developed full-stack PHP and Ruby on Rails solutions for varied freelance projects.

Skills

Ruby	HTML 5
Ruby on Rails	CSS3 & CSS4
Javascript	MySQL
ES6 / ES7	MariaDB
Node.js	PostgreSQL
React.js	MongoDB
Angular 4+	AWS
